

Bluetooth File Transfer Suite

www.newformula.org

The included workflows are designed to be saved as Finder plug-ins, or for use with a launcher such as Spark or Quicksilver. They allow you to easily use your Bluetooth device to transfer files between machines, archiving them to .zip format if required.

They require the Bluetooth Object Push action, freely available from <http://www.automatorworld.com/2005/05/28/bluetooth-object-push/>

This url is also included in the download folder. Please download and install this before going any further.

They have been tested with my Sony Ericsson S700i, which automatically saves them into its 'Other Documents' folder. You may have different experiences with other models and brands of phone, but the result should be something similar. You can then browse the device from another computer to transfer the files, or initiate the transfer from the Bluetooth device.

I TAKE NO RESPONSIBILITY FOR ANY DATA LOST AS A RESULT OF RUNNING THIS WORKFLOW, OR MAKE ANY GUARANTEES AS TO ITS INTEGRITY. BY RUNNING IT YOU AGREE TO THIS. NOTHING'S MY FAULT- YOU USE IT AT YOUR OWN RISK.
